Dr. Mohler Responding Well to Treatment

Friday, January 5, 2007

A good report from [Dr. Russell Moore](#):

I just left from visiting Albert Mohler at the intensive care unit of Baptist East Hospital here in Louisville. I am glad to report that he is doing much better than he was when I spoke to the radio audience of the program about this at 5:05 PM.

While his situation is still very serious, it seems that the doctors have his treatment well underway and he is recuperating well. Pulmonary emboli represent a serious concern under any circumstances but it seems that RAM is responding excellently to the treatment. We can all be grateful the doctors found this development so quickly.

The President is talking and in good spirits. Despite his incredible pain and having just lived through the scare of his life, he was actually able to discuss a book I brought to him the other day about, of all things, the life of Wendell Willkie.

Dr. Mohler still needs your prayers, as do Mary, Katie, and Christopher, so please don't stop them. But I am happy to say that I think his treatment is going well and I expect that he will be back to his life as normal sooner rather than later.
